Uvod

Koriscene tehnologije:

-JavaScript

-HTML

-CSS

-XML

-Bootstrap

-Jquery

-AJAX

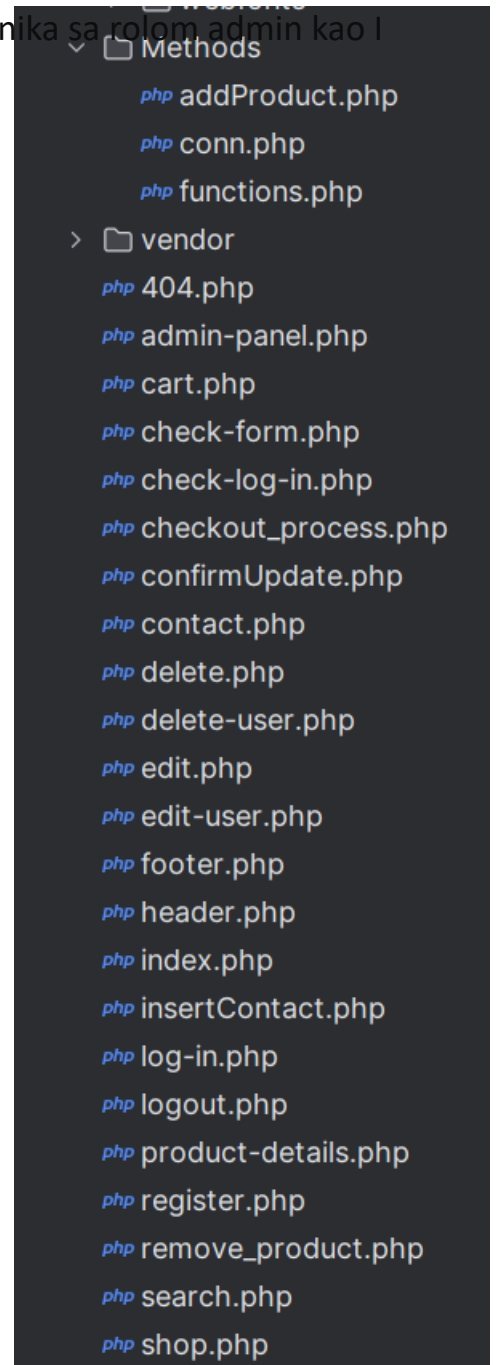

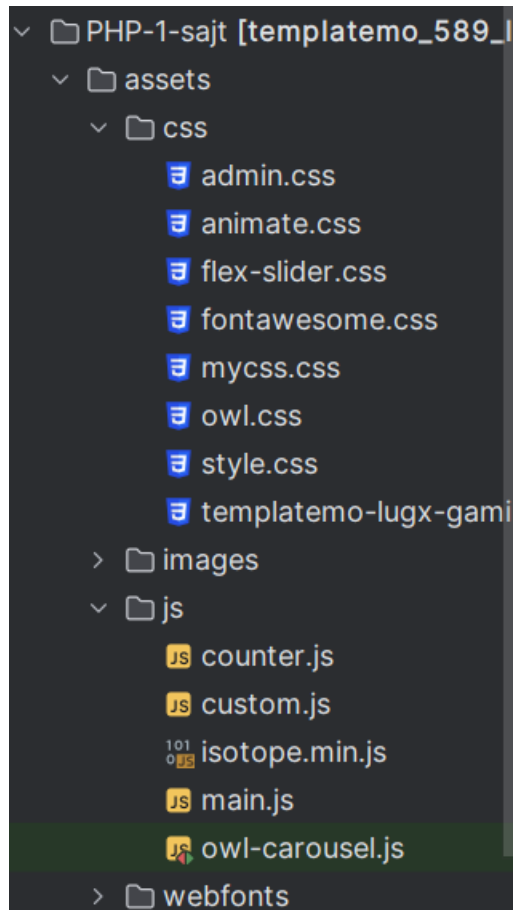

-PHP

Link do templejta:

<https://templatemo.com/tm-589-lugx-gaming>

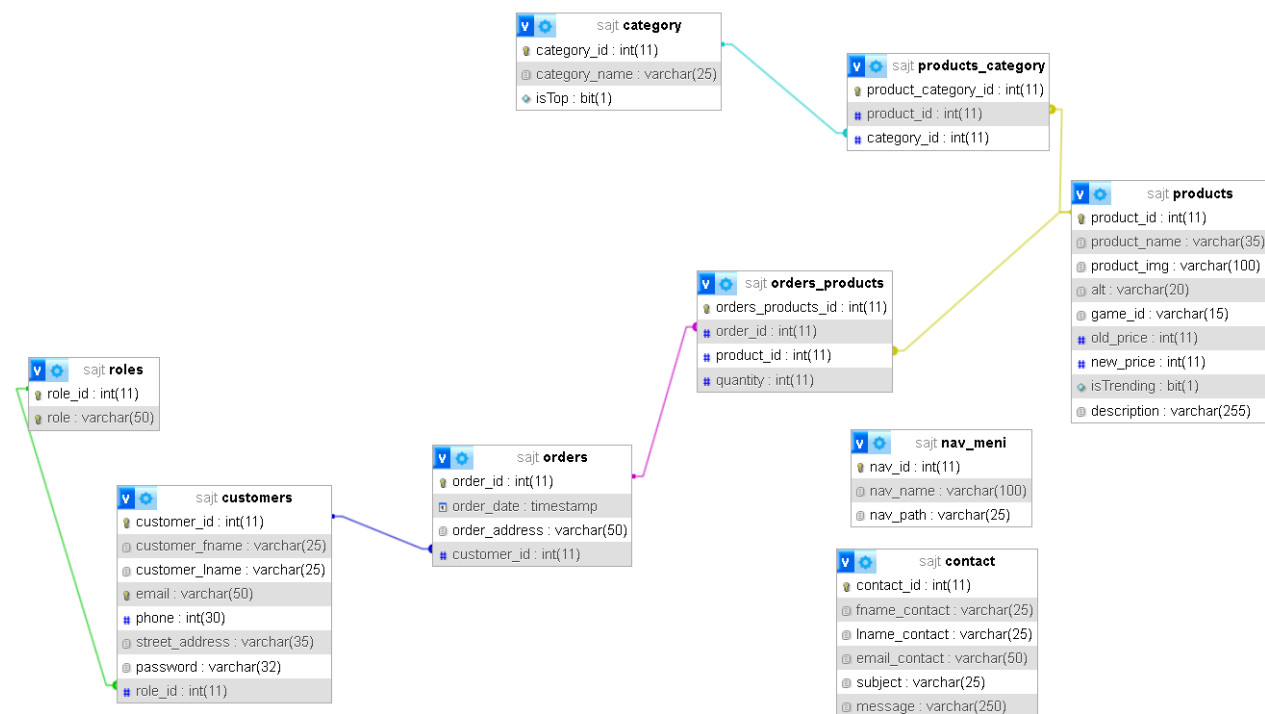

Dizajn samog templejta je malo menjan ali su dodate funkcionalnosti:

korpa, registracija i logovanje, admin panel samo za korisnika sa rolom admin kao i zabrana pristupa korpi dok se korisnik ne uloguje.

Admin.css mycss i style.css su moji css folderi, jedini JavaScript folder koji sam ja pisao je main.js

Sve originalne html foldere sam promenio u php I dodao svoje koje sluze da se izvrse funkcionalnosti na sajtu.

Dijagram baze. Tabela products sadrzi sve informacije o proizvodima I ona je u vezi vise prema vise sa tabelom orders zato imamo medju tabelu orders_products koja za svaki proizvod prikazuje njegovu kolicinu njegov id I id ordera. U orders tabeli se nalaze informacije o tome kada je porudzbina primljena adresa na koju treba da se dostavi I id kupca. Kupac moze poruciti neki proizvod samo ako je ulogovan. U tabeli role se nalaze samo 2 kolone user I admin. Svako ko se registruje na sajt ce automatski imati role user. Contact tabela prima podatke sa kontakt stranice. Iz nav_meni tabele se ispuje navigacioni meni. Takodje jedan proizvod moze imati vise kategorija.

Funkcionalnosti sajta:

Dohvatanje podataka iz baze I dinamičko ispisivanje istih.

Registracija I logovanje korisnika kao I logout.

Admin panel na koji može da pristupi samo korisnik sa administratorskim kredencijalima. Na toj stranici admin može da, menja postojeće proizvode, briše proizvode (kada se proizvod obriše prvo se obriše njegove kategorije u tabeli products_category) I da dodaje nove proizvode.

Korpi mogu pristupiti samo ulogovanu korisnic.

Paginacija odradjena u shopu I admin panelu za proizvode.

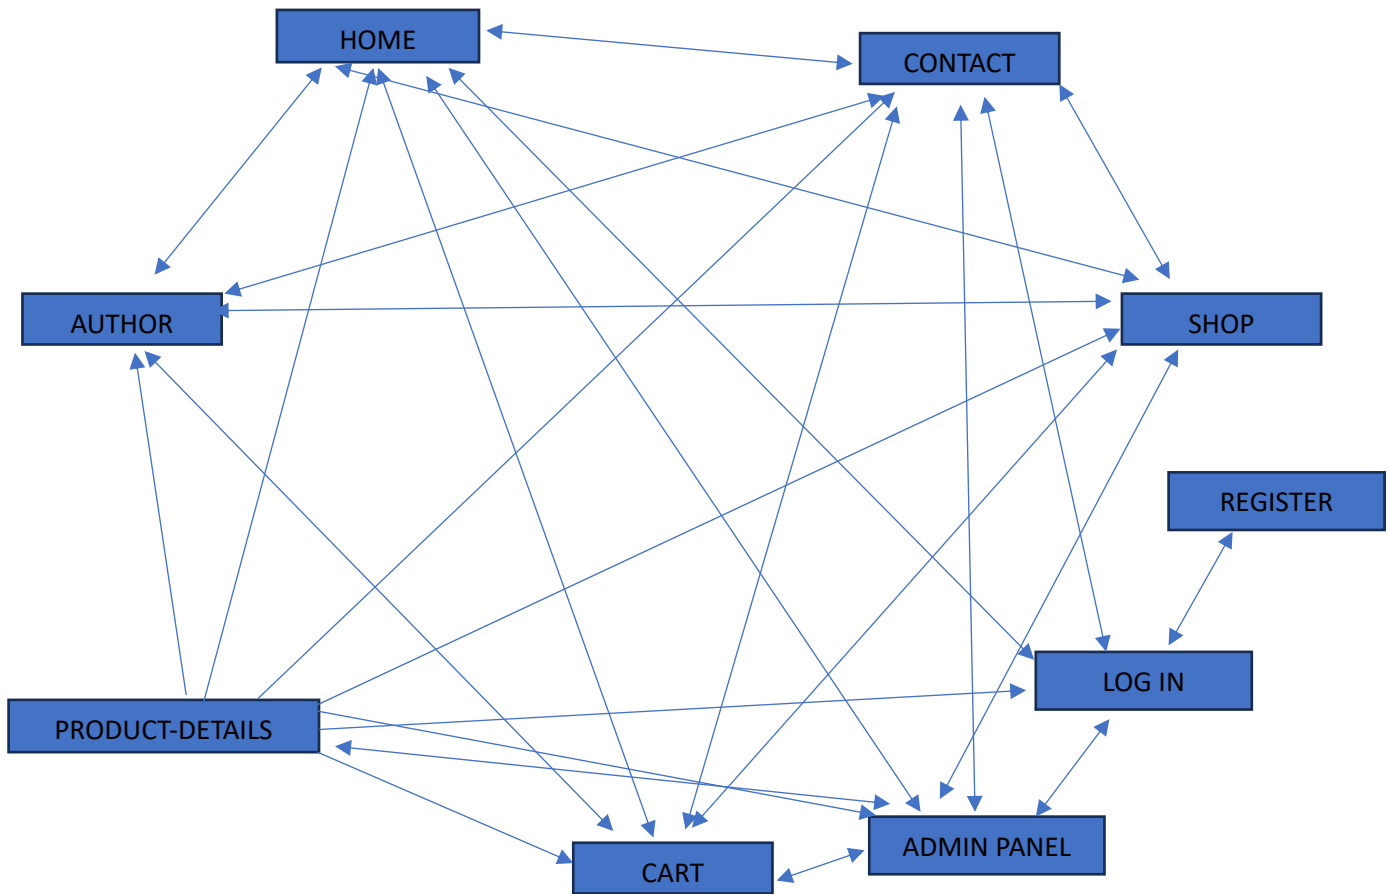

Kontakt stranica poruka korisnika se upisuje u bazu naravno prvo se provere vrednosti koje je korisnik uneo. Na admin panelu admin može videti sve poruke koje su korisnici poslali. Ako je korisnik ulogovan njegovo ime prezime I email biće već ispisani u poljima za kontakt (pamćenje sesije).

Kada korisnik kupi neki proizvod njegov quantity u bazi će se promeniti, na sajtu su dinamički ispisani 6 najprodavanijih proizvoda dakle kada se kupi određeni proizvod njegova kolicina(kupljenih proizvoda) se menja.

Takođe na admin panelu admin može menjati korisnicke naloge ali ne I njihovu sifru.

Single page stranica za svaki proizvod kada se klikne na proizvod bilo gde na sajtu otvorice se stranica koja detaljnije objasjava taj proizvod.

Organizacija

Organizacija sajta i funkcionalnosti na tim delovima

Header je napisan na jednoj stranici header.php I samo sa `include_once()` iskoriscen na svakoj stranici.

Kod za header.php

```
<?php
```

```

include_once("Methods/conn.php");
global $conn;
$upit = "SELECT * FROM nav_meni";
$nav_meni = $conn->query($upit)->fetchAll();

if (isset($_SESSION['user'])) {
    $loginText = "Log Out";
    $loginLink = "logout.php";
} else {
    $loginText = "Log In";
    $loginLink = "log-in.php";
}

foreach ($nav_meni as $nav) {
    if ($nav->nav_name == "Log In") {
        $nav->nav_name = $loginText;
        $nav->nav_path = $loginLink;
    }
}
?>
<header class="header-area header-sticky">
    <div class="container">
        <div class="row">
            <div class="col-12">
                <nav class="main-nav">
                    <!-- ***** Logo Start ***** -->
                    <a href="index.php" class="logo">
                        
                    </a>
                    <!-- ***** Logo End ***** -->
                    <!-- ***** Menu Start ***** -->
                    <ul class="nav">
                        <?php if(isset($_SESSION['user'])):
                            $user=$_SESSION['user'];

                            ?>
                            <?php if($user->role=="admin"): ?>
                                <li><a href="admin-panel.php">Admin
panel</a></li>

                                <?php endif; ?>
                                <?php endif; ?>

                                <?php foreach ($nav_meni as $nav): ?>

                                    <li><a href="<?=$nav->nav_path?>" <?php
if(basename($_SERVER['PHP_SELF']) == "$nav->nav_path") echo
'class="active"'; ?><?=$nav->nav_name?></a></li>
                                    <?php endforeach; ?>

                                </ul>
                                <a class='menu-trigger'>
                                    <span>Menu</span>
                                </a>
                                <!-- ***** Menu End ***** -->
                            </nav>

```

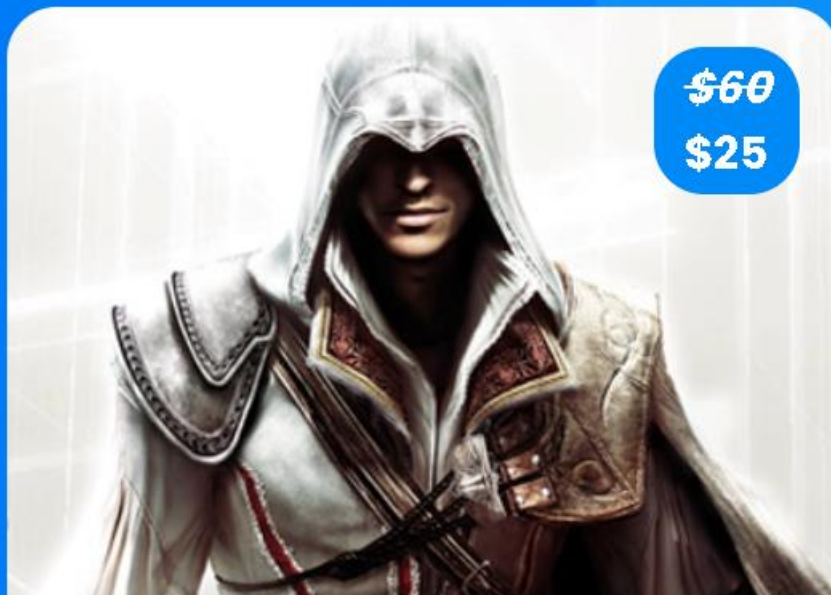

```
        </div>
    </div>
</div>
</header>
```

[Admin Panel](#)[Home](#)[Our Shop](#)[Contact Us](#)[Log Out](#)[Author](#)

Linkovi ispisani dinamicki iz baze.

Assasins Creed 2

~~\$60~~

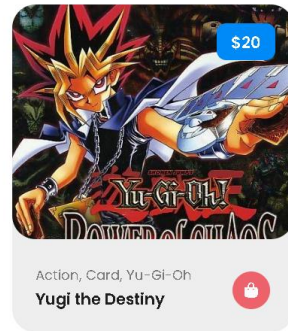

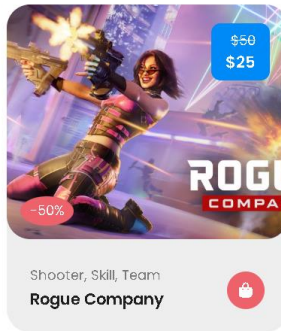

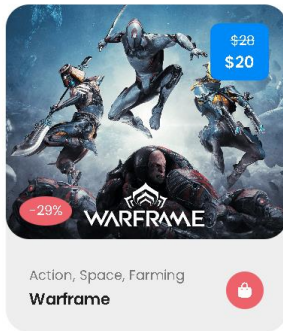

\$25

Dinamicki prikaz proizvoda koji je na najvećem popustu.

```
SELECT product_id, product_name, product_img, alt, old_price, new_price,  
       ((old_price - new_price) / old_price) * 100 AS  
discount_percentage  
FROM products  
ORDER BY discount_percentage DESC  
LIMIT 1;
```

Upit za prikaz tog proizvoda.

Trending Games

[VIEW ALL](#)

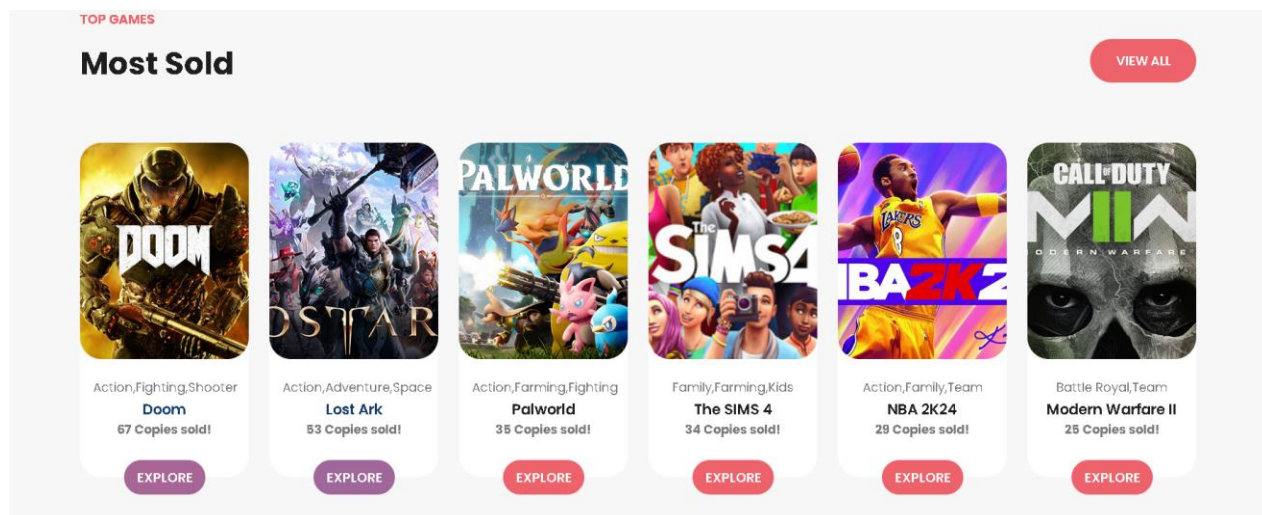

Dinamicki prikaz trending proizvoda I njihovih kategorija.

Proizvod je trending ako u bazi ima isTrending:1 u suprotnom nije trending. Takodje svim proizvodima na celom sajtu racuna se procenat popusta na osnovu stare I nove cene. Nova cena moze biti null ako je null procenat se nece prikazivati I prikazace se samo stara cena.

Kod za prikaz tih proizvoda:

```
<?php foreach ($trendingProducts as $trend): ?>
    <div class="col-lg-3 col-md-6">
        <div class="item">
            <div class="thumb">
                <a href="product-details.php?id=<?=$trend->product_id?">alt?"></a>
                <?php if($trend->new_price == null): ?>
                    <span class="price">$<?=$trend->old_price?></span>
                <?php else: ?>
                    <span class="price"><em>$<?=$trend->
old_price?></em>$<?=$trend->new_price?></span>
                    <div class="discount">-<?=$trend->old_price -
$trend->new_price) / $trend->old_price) * 100)?%</div>
                <?php endif; ?>
            </div>
            <div class="down-content">
                <span class="category"><?=$trend->category_names?></span>
                <h4><?=$trend->product_name?></h4>
                <a href="product-details.php?id=<?=$trend->product_id?"><i
class="fa fa-shopping-bag"></i></a>
            </div>
        </div>
    </div>
```

```
</div>  
<?php endforeach; ?>
```

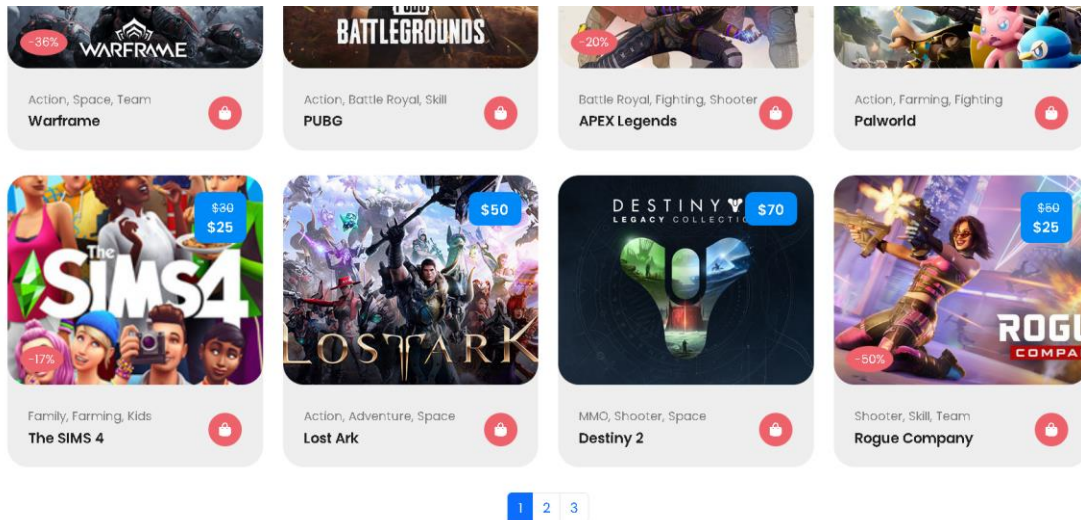

Ovde se prikazuje 6 najprodavanijih proizvoda kao i broj kopija koje su prodate. Broj kopija se dobija iz tabele `orders_products`, ako se na sajtu kupi neki proizvod i taj proizvod postane prodavaniji od nekog prikazanog ovde on ce se prikazati umesto tog proizvoda.

Upit za dobijanje tih proizvoda:

```
$upitZaNajprodavanije = "  
SELECT p.product_id, p.product_name, p.product_img, p.alt,  
GROUP_CONCAT(DISTINCT category.category_name) AS categories,  
SUM(op.quantity) AS total_quantity  
FROM products p  
INNER JOIN products_category ON p.product_id = products_category.product_id  
INNER JOIN category ON products_category.category_id = category.category_id  
LEFT JOIN orders_products op ON p.product_id = op.product_id  
GROUP BY p.product_id, p.product_name, p.product_img, p.alt  
ORDER BY total_quantity DESC  
LIMIT 6;  
";
```

Kod za prikaz tih proizvoda je isti kao za trending proizvode, klasicna for petlja.

Zatim na Our Shop stranici uradjena je paginacija za prikaz 8 proizvoda po strani.

Kod za paginaciju :

```
results_per_page = 8;

$total_products_query = "SELECT COUNT(*) as total FROM products";
$total_products_result = $conn->query($total_products_query);
$total_products = $total_products_result->fetch(PDO::FETCH_ASSOC) ['total'];

$total_pages = ceil($total_products / $results_per_page);

$current_page = isset($_GET['page']) ? $_GET['page'] : 1;

$starting_limit_number = ($current_page - 1) * $results_per_page;

$products_query = "SELECT
    p.product_id,
    p.product_name,
    p.product_img,
    p.alt,
    p.old_price,
    p.new_price,
    GROUP_CONCAT(DISTINCT c.category_name ORDER BY
c.category_name SEPARATOR ', ') AS category_names
FROM
    products p
INNER JOIN
    products_category pc ON p.product_id =
pc.product_id
INNER JOIN
    category c ON pc.category_id = c.category_id
GROUP BY
    p.product_id
LIMIT $starting_limit_number, $results_per_page";
```

```
$products = $conn->query($products_query)->fetchAll();
```

```
<?php for ($page = 1; $page <= $total_pages; $page++): ?>
    <li class="page-item" <?php if ($page == $current_page) echo 'active';
?>">
        <a class="page-link" href="?page=<?php echo $page; ?>"><?php echo
$page; ?></a>
    </li>
<?php endfor; ?>
```

Stranica za detaljni prikaz proizvoda. Na ovu stranicu je omogucen prikaz svakog proizvoda slanjem njegovog id-a putem query stringa u url adresi.

Doom

\$45 **\$25**

Enter a nightmarish world of demons and destruction in DOOM. Unleash hell with powerful weapons and intense action in this iconic first-person shooter.

1

ADD TO CART

Game ID: [DOOM](#)

Genre: [Action, Shooter, Fighting](#)

Kod za dohvaćanje tog proizvoda i njegovog id-a iz query stringa

```
if ($_SERVER["REQUEST_METHOD"] == "GET") {
    if (isset($_GET['id'])) {
        $id = $_GET["id"];
        $upit="SELECT * FROM products WHERE product_id=:id";
        $x=$conn->prepare($upit);

        $x->bindParam(":id",$id);

        $x->execute();

        $product=$x->fetch();
        // var_dump($product);
        $upit2="SELECT GROUP_CONCAT(category_name) as categories FROM
category c INNER JOIN products_category p ON c.category_id=p.category_id
WHERE p.product_id=:id";

        $y=$conn->prepare($upit2);
```

```

$y->bindParam(":id",$id);
$y->execute();

$categories=$y->fetch();

$categoryNames = $categories->categories;

$categoryArray = explode(',', $categoryNames);
}else {
    redirect("404.php");
}
}

```

Sa ove stranice se moze dodati proizvod u korpu

Shopping Cart

	Doom	3	\$75 <input type="button" value="x"/>
---	------	---	---------------------------------------

Enter your address here

Zdravka Čelara 12

Summary

TOTAL PRICE
\$75

Ovako izgleda korpa. Klikom na dugme proizvod ce biti upisan u orders_products ili proizvodi moze ih biti I vise naravno. Adresa je ispisana kroz sesiju korisnik je naravno moze promeniti, adresa je ista kao ona uneta tokom registracije za tog korisnika.

Kontakt stranica u input polja su upisani podatci koje je korisnik uneo pri registraciji :

Sve uneseno ovde se prvo proveriti pa ako su vrednosti ispravne podatci se unesu u contact tabelu u bazi.

Admin panel :

Add Product

Product ID	Product Name	Product Image	Game ID	Old Price	New Price	Is Trending	Description	Edit	Delete
2	Warframe		WM	\$28	\$18	Yes	Dive into Warframe's expansive universe. Command the Tenno, harness their mighty abilities, and engage in epic multiplayer battles against ancient adversaries.	Edit	Delete
3	PUBG		PUBG	\$40	N/A	No	Welcome to PUBG, the groundbreaking battle royale game that sets the standard for intense action. Parachute onto an island with 100 players, fight to be the last one standing.	Edit	Delete
4	APEX Legends		APEX-L	\$30	\$24	No	Plunge into APEX Legends' dynamic universe. Lead your squad, master diverse abilities, and confront legendary adversaries in thrilling multiplayer battles.	Edit	Delete

Admin panelu se moze pristupiti samo ako je korisnikov role “admin” funkcija za proveru da li je korisnik admin :

```
function isAdmin() {
    if (isset($_SESSION['user'])) {
        $role = $_SESSION['user']->role;

        if ($role !== 'admin') {
```

```
        header("Location: 404.php");  
        exit();  
    }  
} else {  
    header("Location: 404.php");  
    exit();  
}  
}
```

Na admin panelu admin moze dodavati novi proizvod evo kako to izgleda:

Product Name:

Product Image:

Alt for Image:

Game ID:

Old Price:

New Price:

New Price:

Is Trending

Yes ☐ No ☐

Description:

Dropdown 1: (Mandatory)

Dropdown 2: (Mandatory)

Category 3: (optional)

Add product

Znaci admin pri dodavanju proizvoda mora izabrati minimum 2 kategorije I da li je proizvod trending I sva ostala polja moraju imati vrednost. Unos ovih podatak je proveren regexima pre unosjenja u bazu. Provera:

```
<?php
error_reporting(E_ALL);
ini_set('display_errors', 1);

session_start();
include_once("functions.php");
include_once("conn.php");
isAdmin();
global $conn;
$error = [];
try{
    if ($_SERVER["REQUEST_METHOD"] == "POST") {
        if(isset($_POST['isTrending'])){
            $isTrending=$_POST['isTrending'];
        }
        else{
            $isTrending=null;
        }
    }
}
```

```

        $error[]="Please select the trending state";
    }
    extract($_POST);
    if ($dropdown1 != 0 && $dropdown2 != 0) {
        if($isTrending==1 || $isTrending ==0 ){

            $productNameRegex="/^[A-Za-z0-9\s\-\&',.()]{3,35}$/";
            $imageRegex="/^assets\/images\/[A-Za-z0-9_-\]{1,95}\.(jpg|jpeg|png|gif)$/";
            $priceRegex="/^(?:100|\d{1,2})$/";
            $newPriceRegex="/^(100|\b[1-9][0-9]?|null)$/";
            $textAreaRegex="/^.{0,255}$/";

            if($newPrice==" " || $newPrice==0){
                $newPrice=null;
            }

            $isValid = array(
                'productName' => checkRegex($productNameRegex,
$productName),
                'image' => checkRegex($imageRegex, $productImage),
                'alt' => checkRegex($productNameRegex, $alt),
